

Mohn Drilling Track Record - Operations

10 year contract 2000-2010, with Total Austral, Argentina, 24 hrs/365 days per year.
Air diving, saturation diving and ROV services from DSV Skandi Patagonia offshore Tierra del Fuego, Argentina, renewed in 2011, expires 2020. JV DOF Subsea and Mohn Drilling AS (MD).
MD owns and operates air & saturation diving systems and WROV system.

The work scope includes annual inspections, maintenance and repair of platforms, subsea production stations and pipelines, in addition to various installation and construction work.

In addition to the general inspection, maintenance and repair work which are performed all the year around the following special projects have been undertaken. These projects involved sat diving, 24 hours/day air diving and ROV services.

- 2016 Argo Subsea stations 1 and 2: Various diving work in connection with plug and abandonment work – for economical and operational reasons it has been decided to plug and abandon the wells at Argo.
Sat diving + ROV.
- Vega Pleyades 24” pipeline survey
ROV.
- Argo Subsea Stations 1 and 2: wellheads inspection and TOV (Tele Operated Valves) change out.
Sat diving + ROV.
- Aries 24” pipeline free span correction.
Sat diving and ROV
- 2015 Argo Subsea Stations: change out of TOVs (Tele Operated Valves) to re-establish remote operation
Sat diving + ROV.
- ROV drill support from drilling rig Noble Houston Colbert, ongoing to June 2016.
- SBM: change of subsea hose, rectification of anchor chains + inspection
Air diving
- Vega Pleyade: tie in of 24” line + 4” MEG line, metrology.
Sat diving + ROV
- Stinger checks on board PJW3000 during 24” pipe laying from shore to Vega Platform
Air diving (Swiber)
- 2014 ROV support during drilling operations
ROV inspection on Argo Subsea stations and platforms

MOHN DRILLING AS

- 2013 Feb/Mar: Inspection of leaks on production pipeline at Argo Subsea stations. Change out of 2 pods.
Sat diving + ROV
- ROV Inspection of leaks at Argo Subsea stations
ROV inspection of platforms incl. FMD
- Oct/Nov: Inspection/metrology as part of preparation for disconnection and replacement of spool piece.
Sat diving + ROV
- 2012 Change out of floating hoses at SBM
24 hrs air diving
- 2011 Free span survey and rectification on 18" Aries and 24" Carina pipelines.
Sat diving + ROV
Platform inspection by ROV
- 2010 Change-out of SBM for Apache, San Sebastian Bay, Tierra del Fuego, Argentina.
24 hrs air diving
- 2009 Argo subsea stations: inspection, anode installation and install new hose between Argo 1 and 2.
Sat diving + ROV
- 2008 Argo 2: one well head pod changed out. Defective hydraulic connectors on wellheads changed out on Argo 1 and 2.
Sat diving + ROV
- Change out of risers at AM2 and AM3 platform for Sipetrol.
Metrology, fabrication and installation of rigid spool-piece at AM3-BRM.
Sat diving + ROV
- Connect flexible risers on DU-1 and DU-2 platforms to new 8" pipeline including rigid pipeline elbow for ENAP.
Sat diving + ROV
- 2007 Repair of 6 5/8" gas lift line and install new 8 5/8" riser on Anguila 1 platform for ENAP.
Sat diving + ROV
- Removal and recovery of 8" riser AM3 platform, removal of flexible spool, install blind flanges of abandoned 8" pipeline, removal of AM2 flexible line etc, Sipetrol.
Sat diving + ROV
- Flooded Member Detection on Hidra Centre and Hidra North platforms.
Sat diving + ROV
Changed out one wellhead pod at Argo 2 subsea station.
Sat diving + ROV

Annual platform inspection/free span surveys by ROV

2006 Installed repair clamps on pipeline from DU-1 to DU-2 at Dungenes Field for ENAP.
Sat diving + ROV

Free span rectification/platform inspection by ROV

2005 Installed 8" Plidco repair clamps on risers, AM2 platform for Sipepol.
Sat diving + ROV

2003-2005 All diving in connection with the installation of Carina and Aries platforms and associated pipelines for McDermott. The work also included installation of Tee Structure and tie-ins of the 18" and 24" pipelines and MEG lines to the platforms and Tee Structure.
Sat diving + ROV

2003 Change out 10" flexible spool at Poseidon Field for Sipepol.
Sat diving + ROV

Intervention on Argo subsea stations.
Sat diving + ROV

2002 Pipeline freespan rectification.
Intervention on Argo 1 and Argo 2 subsea stations – change out umbilicals and connectors.
Sat diving + ROV

Change out subsea hoses on SBM, Hydra Field.
24 hrs air diving.

2001 Core Drilling from DSV Skandi Patagonia.

Change out of SBM at Hydra Field, offshore Tierra del Fuego.
24 hrs air diving.

Intervention on Argo subsea stations – inspection and repair of hydraulic leaks.
Sat diving + ROV

From 1996 to 2001 - Projects with DP Support Vessel Bergen Viking:

- 2000/2001 Grout repair of 28 platform members for Maersk Oil, Danish sector, North Sea
- 2000 Saturation diving and ROV work offshore Egypt/ Red Sea for Gupco/Petrojet, grouting, pipeline rectification, debris removal.
- 1999 Trenching and cable laying in North Sea, for Alcatel Kabel Norge with CapJet 1000. Sat diving, ROV work and trenching offshore Egypt from August 1999 to February 2000.
- 1998 Supply services/ROV support, North Sea.
Installation of risers/ROV support for pipeline repair operations at Åsgard/Visund for Statoil and Norsk Hydro.
- 1997 From October 1997 to July 1998: diving and ROV operations for Qatar National Navigation & Transport offshore Qatar.
Installation of strengthening clamps on J-tubes, Troll B Platform, for Stolt Comex
ROV support for various construction work in North Sea for Stolt Comex,, Esso, EMC, Coflexip Stena, Racal Survey and others
Location and recovery of ditched Sea Harrier aircraft off Tunisian coast for UK Ministry of Defense, using side scan sonar, ROV and ship's crane.
- 1996 ROV/construction support for various clients: Stolt Comex, Noordhoek Diving, Transocean, Amoco, Norsk Hydro.
